

**INDUSTRIAL & COMMERCIAL
TRANSPORTATION SENSORS**

INDUSTRIAL & COMMERCIAL TRANSPORTATION SENSORS

TE Connectivity (TE) is a global technology leader, providing connectivity and sensor solutions essential in today's increasingly connected world. TE is one of the largest sensor companies in the world. Our sensors are vital to the next generation of data-driven technology.

When performance and reliability count, engineers rely on us to help solve tough industry challenges such as emissions reduction, power train improvement and added comfort. We're a leader in providing sensor technologies and associated software/diagnostic capabilities built on market experience and technical expertise. We work closely with customers to design and provide solutions critical for a wide range of harsh and demanding applications, including exhaust, engines, transmissions, braking, suspension and cabins.

INDUSTRIAL & COMMERCIAL TRANSPORTATION APPLICATION SOLUTIONS

TE's pressure, level, temperature, urea quality and humidity sensors are recognized and validated solutions for engine and aftertreatment system support and compliance to global on and off road emissions standards. Additionally, TE designs and manufactures a range of linear position, level, humidity, temperature, speed, and pressure sensors for chassis and transmission applications and has developed innovative combination sensors for cost effective and efficient control. Our sensors are designed and manufactured to exacting specifications, often on a custom basis. Together with our customers, we are working to solve today's biggest application challenges in new and creative ways.

SENSOR TECHNOLOGIES

- CURRENT
- FLOW
- FLUID PROPERTY
- FORCE
- HUMIDITY
- LIQUID LEVEL
- PIEZO FILM
- POSITION
- PRESSURE
- TEMPERATURE
- TORQUE
- SPEED
- VIBRATION

QUALITY STATEMENTS

- AS/EN 9100
- EN 13980
- ESA 266
- IATF 16949
- IEC 61508
- ISO 14001
- ISO 26262
- ISO 9001
- Measuring Instruments Directive 2004/22/EC Annex D

ENGINE MANAGEMENT SENSORS

TE Connectivity offers a broad portfolio of sensors to help Original Equipment Manufacturers (OEM) meet the demands placed on modern engines to provide maximum performance and fuel economy while reducing emissions. TE sensors perform under the extreme temperature, vibration, shock and durability requirements of medium duty and heavy duty on road and off road vehicles.

Lubricants, Oil and Fuel Pressure

- Microfused Pressure Sensor

Engine Oil Condition Fuel Identification and Quality

- Fluid Property Sensor

Humidity Air Intake Monitoring Engine and Emissions Management

- Combination—Humidity, Temperature and Pressure Sensor

Cam/Crank Shaft Speed

- Speed Sensor for Cam/Crank Shaft

Engine Oil Fluid Level

- Capacitive, Inductive and Multi-Point Reed Switch Sensor Options

Engine Oil Temperature

- Nickel Resistance Temperature Detector (RTD) Sensor

Coolant Fluid Level

- Solid State Switch and Level Sensors

Turbo Speed

- Variable Reluctance and Active and Passive Eddy Current Sensors

Low Oil Level Switch

- Magnetic Reed Switch

AFTERTREATMENT SYSTEM SENSORS

TE Connectivity offers a broad portfolio of sensors that help OEMs develop environmentally friendly products that comply with global emission regulations. TE sensors effectively monitor critical components in exhaust gas aftertreatment systems to support their management and reduction of engine emissions.

Urea Temperature

- Negative Temperature Coefficient (NTC) Sensor

Urea Pressure

- Media Isolated Pressure Sensor

In-Tank Urea Quality, Level, Heating and Temperature Assembly

- Urea Level Reed Switches
- Urea Quality Sensor (Advanced Ultrasonic Sensor Technology)

High Temperature Exhaust Gas

- PT200 RTD Sensor

EGR Valve Position

- MR and PLCD Sensor

TRANSMISSION SENSORS

TE Connectivity offers a broad portfolio of transmission sensors that enables OEMs to design and commercialize advanced transmissions that meet the modern demands of vehicle OEMs. TE sensors perform under the extreme temperature, vibration, shock and durability requirements of medium duty and heavy duty on road and off road vehicles.

Transmission Oil Pressure

- Microfused Pressure Sensor

Dual Clutch Transmission Module

- Multiple Sensors Packaged in a Single Module (Shown: 2 Travel and 2 Pressure Sensors)

Transmission Oil Level

- Hall Effect Sensor

Transmission Oil Quality

- Fluid Property Sensor

Transmission Oil Level

- Microfused Pressure Sensor

Transmission Input and Output Speed

- Hall Sensor

Clutch Position

- Magnetic Travel Sensor

Rotary Sensor (TRS)

- Hall 3D with Integrated Magnet

Hall Sensor T40MC2

- Hall Sensor with Moving Magnet

MECHATRONICS TRANSMISSION SENSOR CLUSTER

TE Connectivity has a unique sensor portfolio and capability to develop custom mechatronic sensor solutions for monitoring transmission operation and performance. TE's in-house expertise enables optimized packaged solutions that integrate terminals, connectors, harnessing and sensors to an OEMs exact needs and requirements.

Sensor Cluster

- Combination of more than one sensing element connected by wire and connector

Custom Combination

- Combination of modules, non-integrated sensors and partially clustered with wire and main connector

Sensor Bracket

- Single interface with combination of sensing elements on one bracket

Sensor Module

- Single interface with combination of sensing elements in one housing

PRODUCTS AND CONNECTIVITY - OPTIMIZED SENSOR ARCHITECTURE AND TRANSMISSION NERVE SYSTEMS

- Sensors system
- Wiring & protection
- Connectors
- Interconnections
- Customized sensor architecture layout and packaging

OPTIMIZE FUNCTIONALITY AND QUALITY

- Robust connectivity between sensor elements
- Design freedom
- Opportunity to harmonize / standardize solutions and products
- Future utilization of solutions / repeatability
- Creation of competitive advantage

SAVE TIME & EFFORT

- Turn key engineering and sourcing solution
- Expedite program launches
- Consolidate and streamline purchasing, engineering and service

LOWER TOTAL COST

- Cost-optimized solutions
- Program size and volume based pricing

VEHICLE CONTROL AND MANAGEMENT SENSORS

TE Connectivity offers a broad portfolio of sensors that helps vehicles operate safely, increase productivity and maximize vehicle uptime.

Tilt and Ride Stability

- Single and Dual Axis Tilt Sensor
- Gyro Compensated

Load Pin

- Multi-channel Force Sensor

Hydraulic Fluid Condition

- Fluid Property Sensor

Power Steering Fluid Level Single or Multi-Point

- Magnetic Reed Sensor

High Pressure Hydraulics and Hydrostatic Transmission Pressure

- Microfused Pressure Sensor

Steering Control Hydraulic Spool Valve

- Linear Variable Differential Transformer Position Sensor
- Magnetoresistive Linear Sensor Array

Fuel Level

- Magnetic Reed Switch Sensor
- Reed Switch Based Level Sensor

Air Brakes

- Media Isolated Pressure Sensor

Short to Long Stroke Boom Position

- String Pot Sensor

Health and Condition Monitoring

- Embedded PE Vibration Sensors
- Pumps, Motors and Gear Boxes

Hydraulic Oil Level

- Hall Effect Sensor

Engine and Transmission Shafts

- Microfused Static Torque Sensor
- Dynamic Torque Sensor Inductive Technology
- Multi-axis Force and Torque Load Cells

Wheel Speed

- Hall Sensor with and without Integrated Magnet

CABIN AND OCCUPANT SAFETY SENSORS

On and off road vehicle operators encounter extreme weather and terrain, intense duty cycles and complex vehicle operation. Whether the vehicle application is short haul, long haul, construction, agriculture, forestry or mining, TE Connectivity sensors enable OEMs to build safer and more efficient vehicles that operators demand.

Anti-Fogging and HVAC

- Humidity and Dewpoint Sensor

Rotary Position

- Rotary Encoder

Seat Occupancy

- Microfused Load Cell
- Piezo Film Sensor

Cab and Seat Level

- Tilt Sensor or Switch

Seat, Handbrake and Footbrake Position Safety Interlock Switches

- Proximity, Hall and Vane Sensor

HVAC System Control

- Pressure Sensor

Fluid and Material Temperature

- NTC, Platinum, Thermocouple and Thermopile Sensors

Brake Light Switch

- Hall Sensor

ELECTRIC MOBILITY SENSORS

TE Connectivity offers a diverse portfolio of sensor technology for on and off road vehicle OEMs which enables their development of hybrid electric and fully electric vehicles, including vehicles powered by hydrogen fuel cells. Engineered for reliability under harsh conditions, TE sensors provide OEMs the capability to build breakthrough e-mobility solutions to reduce pollutants and increase vehicle efficiency.

Current Sensing

- Coreless and Integrated Current Sensors
- Shunt Sensor

Temperature Sensing

- Stator Winding Temperature Sensor

Resolver: Angular and Speed Sensor

- Accurate and Robust
- Including Cable and Optional Temperature Sensor

Tilt and Ride Stability

- Single and Dual Axis Tilt Sensor
- Gyro Compensated

Fuel Cell Humidity Management

- TRICAN Relative Humidity, Temperature and Pressure Digital Combination Sensor

Fuel Cell Hydrogen Pressure

- Hazardous Area Rated Pressure Sensor

Start and Stop City Buses

- Hydraulic Starter Pressure Sensor
